PROFILE

Full-stack developer with hands-on experience building production web and mobile applications, AI/ML systems, and AI automation workflows. Skilled across the full development lifecycle — from UI development to backend systems, cloud deployment, and QA. Looking to contribute immediately to engineering teams building meaningful products.

EDUCATION & CERTIFICATIONS

- Bachelor of Science in Computer Engineering** 2026
Cebu Institute of Technology – University, Cebu City
Cum Laude | Parangal Awardee (Top-Performing Students) | Member of the King's Court
- IBM Full Stack Software Developer Professional Certificate** 2026
IBM / Coursera | 15-course specialization: HTML, CSS, JavaScript, React, Node.js, Python, Django, Docker, Kubernetes, CI/CD, cloud-native. Capstone SaaS project delivered.
- AI Automation & Generative AI Training** 2026
TESDA / Advanced | 5-day intensive training covering AI automation, generative AI tools, and practical AI workflow implementation.

WORK EXPERIENCE

- Software Quality Assurance Intern** Jun – Jul 2025
Arielus Software Inc., Cebu
- Performed regression, smoke, and functional testing across multiple software modules, identifying and documenting 400+ defects during the internship.
 - Built and maintained automated test cases using Selenium, cutting regression testing time by roughly 30%.
 - Tracked defects in Azure DevOps, maintaining an average resolution turnaround of under 2 business days alongside the development team.
 - Supported sprint-level QA processes to validate compliance with quality standards before each release.

UNDERGRADUATE THESIS

- AI-Enhanced Thermal Imaging System for Early Detection of Diabetic Peripheral Neuropathy** 2026
AI Developer & Researcher | CIT-U
- Developed a mobile diagnostic tool for early-stage diabetic peripheral neuropathy (DPN) detection using a FLIR One Pro thermal camera paired with a YOLO11 classification model.
 - Achieved over 97% classification accuracy on the validation dataset, reliably identifying thermal anomalies associated with early neuropathy.
 - Designed the custom PCB layout for the thermal imaging hardware and trained the AI classification model, including dataset preparation, model fine-tuning, and inference pipeline integration. Also collaborated on the development of the mobile application.
- Tech:** React Native Expo, PyTorch, YOLO11, TensorFlow, OpenCV, FLIR One Pro, Supabase

PROJECTS

- HanapBuhay — Hyperlocal Freelance Marketplace**
Full-Stack Developer | hanapbuhay.vercel.app
- Built a hyperlocal freelance marketplace connecting clients with local service providers — carpenters, tutors, babysitters — with job postings, worker profiles, in-app chat, and a ratings system.
 - Implemented real-time messaging and rating systems, achieving an average session response time of under 1.2 seconds on standard mobile connections.
- Tech:** Next.js, TailwindCSS, TypeScript, Supabase, PostgreSQL
- OptiCare — Optometry Clinic Management System**
Full-Stack Developer | danledan.vercel.app
- Built a web application for optometry clinics to manage patient records, appointments, and prescriptions with full CRUD functionality.
 - Delivered a responsive UI that reduced average appointment booking time from 8 minutes to under 2 minutes.
- Tech:** Next.js, TailwindCSS, JavaScript, Firebase
- MentorMatch — Student Mentorship Booking App**
Full-Stack Developer
- Built a mobile app for students to discover, book, and manage mentorship sessions across 10+ academic disciplines.
 - Contributed to system architecture, front-end UI, and backend API integration.
- Tech:** .NET MAUI, XAML, Microsoft Azure, Azure SQL

TECHNICAL SKILLS

Languages: C, C++, C#, Java, JavaScript, Python, TypeScript
Frontend & Mobile: React.js, Next.js, React Native Expo, TailwindCSS, BootstrapCSS, .NET MAUI, Flutter, Astro, HTML
Databases & Cloud: Supabase, Firebase, MySQL, Azure SQL, Appwrite, AWS IoT Core
AI / ML: PyTorch, TensorFlow, YOLO11, CNN Development, OpenCV, Claude API, OpenAI API, AI Automation
Tools: Git/GitHub, Docker, Selenium, Azure DevOps, Figma, Claude Code
Soft Skills: Problem-Solving, Critical Thinking, Leadership, Collaboration & Teamwork, Adaptability, Time Management
